

B-HORIZON

M I C R O E L E C T R O N I C S

B-Horizon is an internationally-active IC consultancy and design company with focus on the automotive, industry and consumer segments. We operate with the agility of a startup and the professionalism and solid process structure of a market established benchmark.

Our passion and extensive experience in microelectronics as well as our wide range of consultancy and development services highlight our core competencies. With our services we leverage the lead position of our customers applications by enabling their innovative products with the best achievable time to market and total cost of ownership.

You have the same passion for microelectronics? Send us your application and become a part of our team and our success story. We are currently looking for a

Project Manager for ASIC-Development (m/f)

(Reference Number: PLA0118)

Responsibilities:

- Planning, leading and controlling of innovative and complex ASIC development projects
- Support in project acquisition and feasibility evaluation
- Responsible for project reviews and reporting to customers and management
- Coordination and collaboration with customers, suppliers and internal departments during the whole development process
- Implementation of risk, change and escalation management to ensure strategic project goals
- Contribute in process improvement and optimization

Qualifications:

- Degree in electrical engineering with a focus on microelectronics or degree in a similar field of study
- In-depth knowledge on semiconductor technologies and processes
- 5+ years of working experience in semiconductor or high-tech industry
- The ability to understand technically complex contexts to consolidate and present those on a management level
- Several years of professional experience in process or product development (preferred in the automotive field)
- Strong skills in design, verification, validation, production and qualification of ICs
- Experience in management of internal and external development teams
- High level of commitment, analytical intellectual power, empathy, customer and service orientation and problem-solving competences
- Collaborative skills, initiative, flexibility, solution oriented and independent work approach
- Good speaking and writing skills in German and English
- Travel flexibility

Benefits:

- Exciting work environment and extensive introduction to the required technical contexts
- Good development opportunities in a growing company
- Taking responsibility of a variety of tasks
- Working in an experienced, dynamic and agile team
- Modern work environment with flexible working hours

We are looking forward to your convincing application documents.
