

B-HORIZON[®]
MICROELECTRONICS

We create technologies
for tomorrow.

Intern/ Working Student in the field of Artificial Intelligence / Machine Learning (m/f/d)

Your Previous Experiences:

Studies in the field of informatics, data science, mathematics, computational sciences or in a similar field of study

Initial experience in the field of artificial intelligence frameworks & data analysis

Basic knowledge in the area of artificial intelligence & machine learning

Good programming skills (e.g., Python, C++, MATLAB) & mathematical skills

Technological understanding & practical skills

Collaborative skills, initiative, flexibility, good skills in German & English

Your Responsibilities:

Active support to the development of machine learning algorithms for innovative projects

Research, test & evaluation of new AI technologies & presentation of the results

Contribution to the specification of software with integrated AI algorithms

Contribution to the development of AI based embedded software

Your Benefits:

Impact on future technologies

Individual development opportunities in a growing company

Practical & business insights, variety of tasks

Experienced, dynamic, diverse, & agile team

Modern work environment with flexible working hours

B-Horizon is an internationally active company with business divisions for development of microelectronics and sensors. We offer IC consulting and design for the development of individual and innovative semiconductor solutions in the automotive and consumer goods industry. B-Neo, our next generation smart sensor system, can be applied in various areas, as car seats, athletic shoes, or gaming suits.

Our passion for technology and extensive experience in the development of microelectronics and sensors, as well as our wide range of services, are the foundation of our success. Thereby our customers benefit from our working style: with the agility of a start-up, combined with the professionalism of a benchmark company.

Are you interested in new professional horizons?

We are looking forward to your application by E-Mail!
